What the project is about

- No news aggregator website with user interaction is comfortable to use
- We are creating a news aggregator website that provides a good user interaction

Iteration 1 backlog

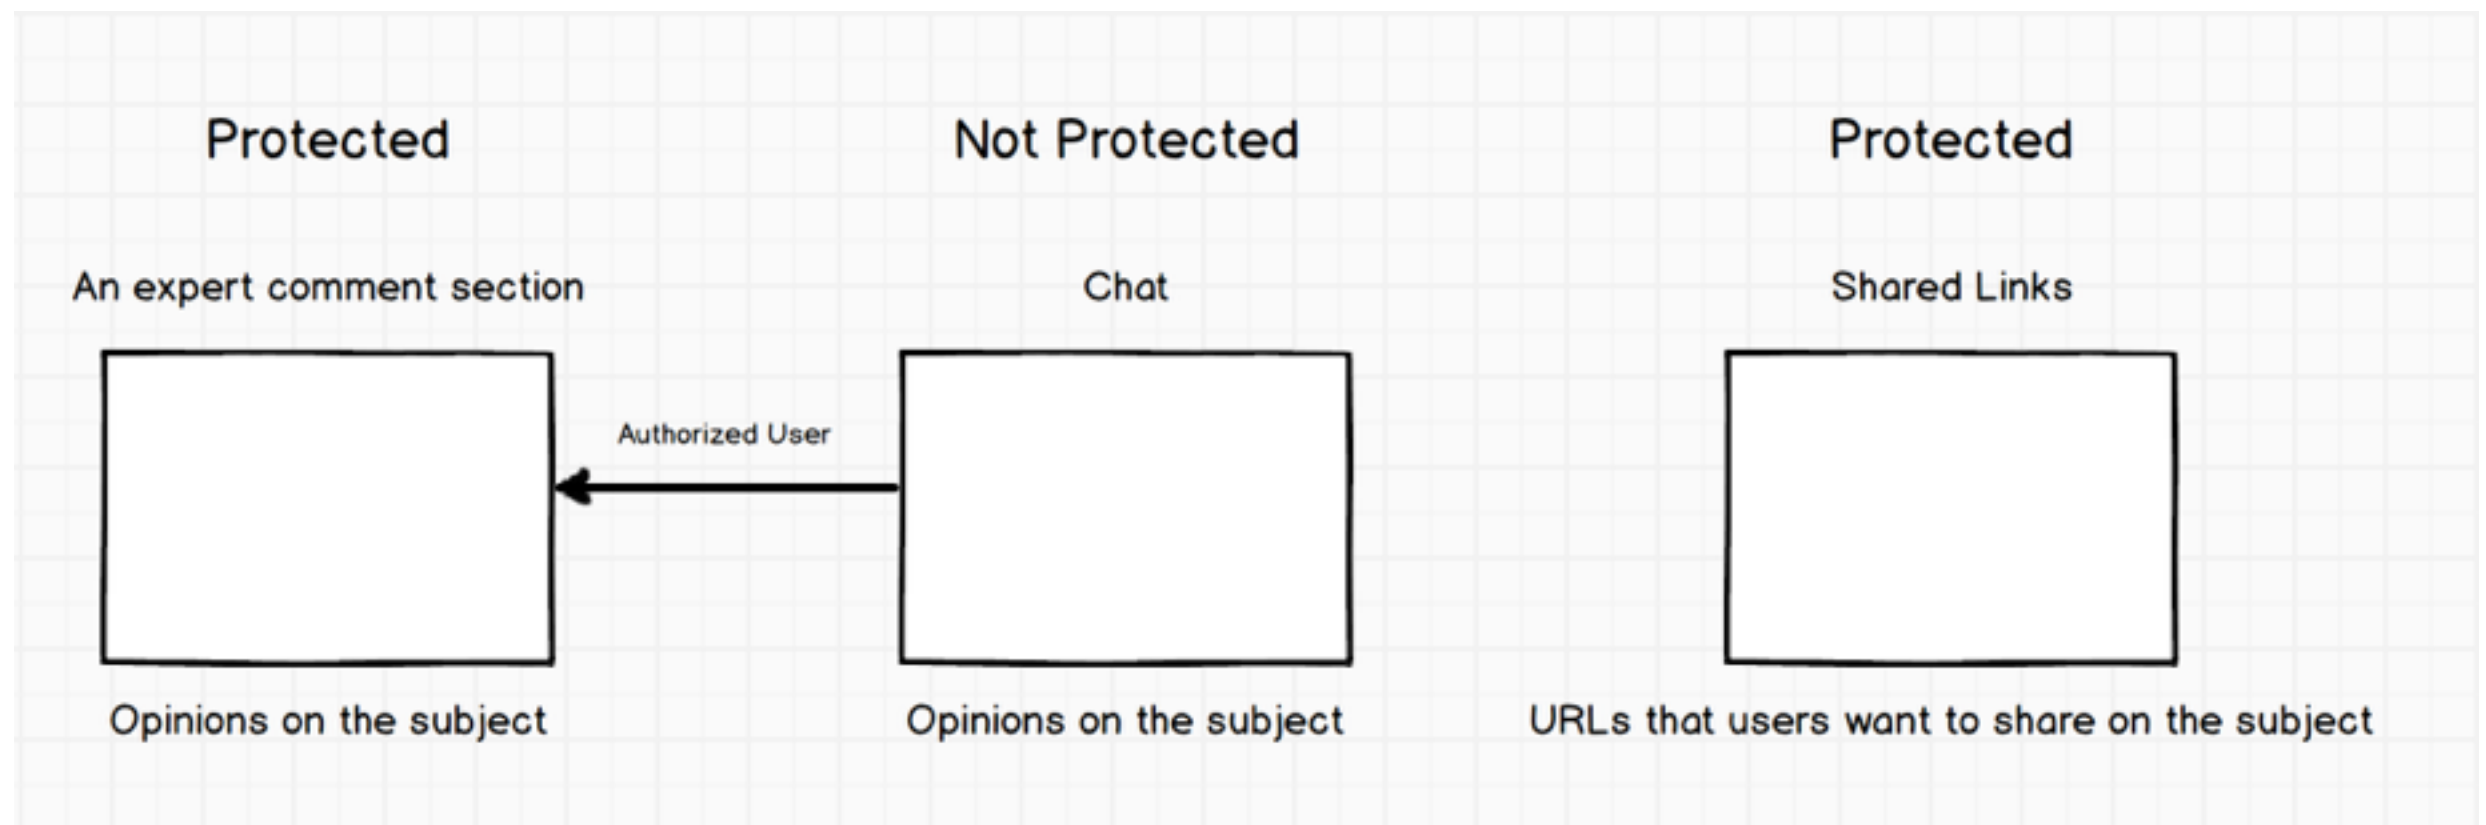

- Create a website mockup
- Meet with a specialist in a web search field
- Plan and discuss database model
- Discuss the technology stack that might be used in the project

Completed Tasks

- Had a meeting with a project advisor
 - Discussed technologies needed for the project
 - Talked about potential competitors and advantages of our website
 - Planned user-interactive aspects of our website

Details of completed task

- Organization of Comments:

Unaccomplished Tasks

- Choose a database for the project
 - Not enough time to research
- Design mockup
 - Haven't finished UI design

Retrospective

- Things that went well
 - Had a good discussion with the project advisor
 - Team meetings are productive
- Things that didn't go well
 - Not enough team meetings
- Things to consider for the next iteration
 - More team meetings
 - Work more on design aspects
